

# Guitar Strap Kit Instructions

Requires webbing 2 inches wide, 55 inches long (Sold Separately). Use a heavy felt tipped marker (not included) to color the leather ends if desired.

Fold and Sew one leather end onto loop ring with heavy duty thread.

Sew other end of webbing onto middle bar of Tri-Glide Adjuster with heavy duty thread.

Pass the leather end sewn onto the end of the webbing through the bottom of the Tri-Glide Adjuster, up through the top and then back down through the other side as shown.

Sew one leather end onto end of webbing with heavy duty thread. Rectangle indicates stitching line.

Pass loop ring with leather end sewn onto it; onto webbing from the side with the leather end.

Completed Guitar Strap
